**Smaller quantities available in inventory, larger quantities available through special order

Typical application requires that a wood plug be 1/16" larger than the hole.

Poles, Inc. also provides treated hardwood plug sizes that are not listed above. If you are looking for a size that is not in our inventory, please contact Randy Gross, (719) 685-0444.

Our plugs are produced using a number of hardwood species. Plugs are treated with either Copper Naphthenate, CCA or ACQ.
